Skills

Technical Skills

Proficient in Python, Java, MATLAB, and SQL. Experienced in data analysis and machine learning.

Soft Skills

Effective communication, teamwork, critical thinking, problem-solving, and adaptability.

Leadership

Demonstrated leadership qualities in academic and extracurricular activities. Able to lead and motivate teams.

Projects

1

Smart Home System

Designed and implemented an IoT-based smart home automation system utilizing Raspberry Pi and sensors.

2

Mobile App Development

Developed an Android app for real-time environmental data collection and analysis using GPS and sensors.

3

Data Analytics

Performed predictive data analysis on climate patterns using Python and machine learning algorithms.

Education

▼ Bachelor's in Computer Engineering

Graduated with honors. Specialized in software engineering and completed a research thesis on data visualization techniques.

▼ Advanced Certifications

- Project Management
- Data Science
- Machine Learning
